Subject: iTalent HR System — Full Implementation Plan

This is the proposed implementation plan for transitioning our leave management and employee self-service processes to iTalent. Please find the full details below.

1. Current Situation vs. Target State

Area	Current	After iTalent
Leave requests	Email to manager + hr.egy@51talk.com	Digital submission via iTalent ESS portal
Approval tracking	No system — email threads	Full audit trail in iTalent
Leave balance visibility	HR-managed only	Employees see real-time balance
Leave data for payroll	Manual leave sheet (Excel)	Auto-exported from iTalent on 21st monthly
Approval enforcement	Honor-based	Configurable multi-level workflows

2. What Is Already in the System

After a live review of iTalent (51talk.italent.cn):

✅ Already configured:

- 7 leave types (Sick, Annual, Unpaid, Maternity, Paternity, Bereavement, Miscarriage)
- Employee Self-Service portal with My Approval, My Attendance, My Profile
- Batch approval and Process Delegation for managers

⚠ Requires configuration before go-live:

- Review configured Leaves types vs handbooks.
- 2 leave types unnamed (will be set as Casual Leave & Marriage Leave)
- Approval workflows not yet assigned per leave type
- Email notifications not configured

3. Implementation Plan — 7 Phases

Phase	What	Duration
0 — Prerequisites	Employee data backup, CC Team manager briefed	2–3 days
1 — Leave Configuration	Fix leave types, set entitlements per handbook, configure carryover	Week 1
2 — Approval Workflows	Build approval chains per leave type, set notification rules	Week 1
3 — Dashboard Integration	Connect iTalent leave export to Attendance Dashboard	Week 2
4 — ESS Configuration	HR Letter certificate, disable overtime, configure business trips	Week 2
5 — Notifications	Email alerts for managers, employees, and HR on all leave events	Week 2
6 — Pilot + Full Rollout	CC Team pilot → evaluate → company-wide rollout	Week 3–4
7 — Operations	Monthly export-import cycle, balance management	Week 5+

4. Rollout Strategy

- Week 1: Configure & integrate
- Week 2: CC Team pilot goes live (parallel with email process)

- Week 3: Review pilot, fix any gaps
- Week 5–6: Full company rollout + training sessions
- End Week 6: Email-based leave process retired

No risk to employees during transition: Email-based process stays active during the pilot. No leave request will be lost. Opening leave balances will be imported before anyone accesses their account.

5. Leave Types & Entitlements (Per Handbook)

Leave Type	Days	Pay	Key Rule
Annual Leave	15 (<1yr) / 21 (≥1yr)	Full	Carryover allowed
Casual Leave	7/year, max 2/request	Full	Counts toward annual balance
Sick Leave	As needed	75%	Doctor's note required
Maternity Leave	120 days	Full	Birth cert required
Paternity Leave	1 day × max 3/year	Full	Proof required
Marriage Leave	3 days	Full	Proof required
Bereavement Leave	3 days	Full	Parents/spouse/children only
Miscarriage Leave	Per labor law	Full	Medical documentation required
Unpaid Leave	As approved	0%	Manager + HR dual approval

6. Risks & How We're Managing Them

Risk	Mitigation
Employees don't adopt the system	Training sessions + Arabic/English quick-start guide
Data mismatch with Attendance Dashboard	2-week parallel run before cutover
Manager approval delays	Process Delegation configured for all managers
Leave history lost	Opening balances imported before any employee accesses the system
System downtime	Backup: revert to email process temporarily
